

Extinct Animals

When thinking about extinct animals, people usually think of [dinosaurs](#), relying on their limited knowledge gained from the Jurassic Park films, which often, palaeontologists have now discovered, often portrayed them inaccurately.

Scientists estimate that 99.9% of all species of plants and animals that have ever lived are now extinct. Depicted below, are twenty extinct animals, can you put a name to them? Some names are short; others are tongue twisters.

To help, listed below are the names for you to match up.
