

### Hazard Pictograms 01

Being aware of and understanding the signs in some workplaces is vital for day-to-day safety. It seems that everywhere is potentially bursting with flammable objects, hazardous chemicals, and items that need to be handled with special care. To protect employees, and ultimately the public-at-large, it's imperative that adequate signage is in place to warn and enlighten workers and visitors to possible risks.

In Hazard Pictograms 01 below, there are 20 warning symbols. But warning against what? Can you identify them?

|                                                                                     |                                                                                     |                                                                                      |                                                                                       |
