

Safe Condition Pictograms

A pictogram uses pictures or symbols to represent data or information. A road sign that uses images to convey a meaning is a type of pictogram. In maths, charts that use images or symbols instead of bars are also pictograms. [A Safe Condition pictogram](#) communicates the location of emergency equipment or escape routes. The pictorial information indicates emergency exits, first aid, or rescue facilities, emergency equipment location or direction of an escape route.

In Safe Condition Pictograms below, there are 20 symbols. But indicating what? Can you identify them?
