

Musical Instruments

The history of [musical instruments](#) dates to the beginnings of human culture. Musical instruments have evolved in step with ever changing applications and technologies. No longer do people bang hollow tree trunks, there are orchestras, folk music, bands, and groups. Different parts of the world developed different ways to produce sounds; the hollow logs, animal bones, stretched animal intestines and hides.

Below, there are 20 drawings of various sound producing instruments. Can you identify them?
